INK AND CORRESPONDING PRE-TREATMENT MACHINE FOR CONSISTENT RESULTS

We develop our pre-treatment machines for you to get the best out of our inks. Colour matching is facilitated in order to achieve steady colour results, even when they come from different production points or printing and post-processing facilities.

COLOURING TEST BEFORE THE PRODUCTION RUN

With the introduction of the new textile production line of pre-treatment, printing, and post-treatment machines, Mimaki can also conduct colouring tests adapted to your requirements. The colouring test makes sure you can start your production smoothly, as soon as the production line is set, without testing delay.

ONE-STOP SOURCE FOR YOUR TEXTILE PRODUCTION

By choosing your textile production line from Mimaki, you will need only one contact to assist you with any point of the production line, making sure it is in consistence with the preceeding or following step. From the printer to the coating and washing machines, everything is covered by one support service, for your peace of mind. With vast global network of long-established partners and unparalleled textile printing heritage, Mimaki is here to support your business from start to finish.
