

Two Software Options and a Cloud Application for Production Management

■ Textile RIP Software for Apparel and Interior Applications

**TxLink5**  
Equipped with user-friendly features for textile production.

■ Beginner-friendly RIP software designed for ease of use and simplicity.

**Raster Link 7**

Mimaki Cloud Technology **PICT**

PICT allows users to monitor printer operation and ink usage remotely. It supports better planning by providing real-time data on operational status and performance. PICT helps with scheduled maintenance and preparing for ink refills, ensuring smooth and efficient production.

✓ Production control  
✓ Prepare for ink refilling  
✓ Scheduling of maintenance etc...

  
Cloud

Environmentally Certified Inks for nearly Waterless Textile Printing

 **TP410, Sb420, Sb411**

Safety and environmental friendliness are exceptional:  
TP410 is bluesign®APPROVED and Sb420/Sb411 are ECO PASSPORT certified.

Flushing liquid 03 2L		Flushing liquid for ink replacement

●Some of the samples in this catalog are artificial renderings. ●Specifications, design and dimensions stated in this catalog may be subject to change without notice (for technical improvements, etc). The corporate names and merchandise names written on this catalog are the trademark or registered trademark of the respective corporations. ●Inkjet printers print using extremely fine dots, so colors may vary slightly after replacement of the printing heads. Also note that if using multiple printer units, colors could vary slightly from one unit to other unit due to slight individual differences. ●The specifications described in this catalog are as of April 2025.

For **TEXTILES & APPAREL**

**The Complete Textile Printer**

Direct-to-Textile Inkjet Printer

**TX330-1800B**

Belt-Fed Model

8-Color Textile Pigment Ink, Including Green

Even more vibrant colors

Unique Belt Conveyor System

Stable printing on stretchy Fabrics

Max. 646 sqft/hr high-density fabric print

Easily switch - fabric & paper printing

**TX330-1800**

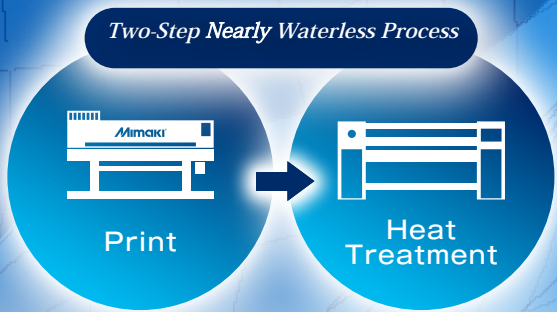

Hybrid Model

Virtually Waterless & Sustainable Digital Textile Printing

Even More Beautiful, Even Faster!  
A Simple, Nearly Waterless  
Process Making Digital Textile  
Printing More Accessible

\*Depending on the fabric type, pre-treatment may be required before printing.

Now with Green! 8-color inkset for exceptionally vibrant prints.

TX330-1800B  
Belt-Fed Model

The sticky belt system securely conveys fabric without external tension, ensuring stable, high-quality printing—even on stretch fabrics and thick materials. The new textile pigment inks deliver vibrant colours, making them ideal for apparel production.

Knit

Lycra

Power Net

Pile

Up to 60m<sup>2</sup>/h! Vibrant soft sign production with high density.  
(646ft<sup>2</sup>/h)

TX330-1800  
Hybrid Model

Supports both sublimation transfer and direct sublimation printing. With an easy switch between print mechanisms, you get the functionality you need, exactly when you need it.

Ink-Receiving Spacer  
(for fabric)

Platen  
(for transfer paper)

Ink Types Nearly Waterless Textile Printing Inks for Various Fabrics and Applications

Textile Pigment Ink  
TP410

Suitable for printing on a wide range of fabrics, including natural and synthetic fibers. Ink is fixed only by thermal treatment, simplifying post processing facilities.

\*Additional equipment may be required depending on the printing conditions.

Dye Sublimation Ink  
Sb420

Designed for direct printing on polyester fabric, delivering vibrant visual communications.

Sublimation Transfer Ink  
Sb411

Used for printing on sublimation transfer paper, which is then transferred to polyester fabric with heat.

\*Sublimation Transfer Ink (Sb411) is only compatible with the Tx330-1800 when using the hybrid ink set.

Hybrid Ink Set Using two types of ink in one machine expands application possibilities.
